

CLAIMS

WHAT IS CLAIMED IS:

1. A multilayer photovoltaic (solar) cell module comprising a backing layer, wherein the backing is
5 comprised or consists essentially of a blend of an ethylene/acid copolymer ionomer dispersed in a continuous or co-continuous polyamide phase.

2. A process for preparing a backing for a solar cell wherein the backing is obtained from a blend of an
10 ethylene acid copolymer ionomer dispersed in a continuous or co-continuous polyamide phase by a process comprising the step of making a blown film or an extrusion cast film from the blend.
